Using Air

TCPH<CHRSOf a buttered morning
a coed in legwarmers bound
 for Poly Sci and yet

 they signal creaking
practice boards be-
neath an icy light,

adjunct not to art
    but pain

    splayed out
    after a rag
    doll flop.

The newest anything jives
 sweaty trial and its
impure collapse.

            A stylish hat
            is softly cool
            in forming

                light. The old heart
                heaves to
                        burn-
ing work.
